## Chapter 1

### GaAs Field Effect Transistor

|   |   |
|---|---|
| 1.1 Introduction.....                                     | 1 |
| 1.2 Crystalline structure of GaAs.....                    | 1 |
| 1.3 Properties of GaAs .....                              | 2 |
| 1.4 Material preparation.....                             | 2 |
| 1.4.1 Bulk growth of substrate material.....              | 2 |
| 1.4.2 Material for the conducting channel .....           | 3 |
| 1.5 The Metal Semiconductor Field Effect transistors..... | 4 |
| 1.5.1 General structure.....                              | 4 |
| 1.5.2 Principle of MESFET operation.....                  | 4 |
| 1.5.3 DC characteristics.....                             | 5 |
| 1.5.4 Saturation characteristics.....                     | 8 |

## Chapter 2

### Deep Levels in GaAs

|   |    |
|---|----|
| 2.1 Introduction.....                                   | 11 |
| 2.2 Deep Level and their interaction with carriers..... | 12 |
| 2.3 Generation Recombination processes.....             | 13 |
| 2.4 Transient evolution of trapped carriers.....        | 15 |
| 2.5 Detailed Balance Principle.....                     | 17 |
| 2.6 Deep Level Transient Spectroscopy technique .....   | 17 |
| 2.6.1 Principle of the technique .....                  | 18 |
| 2.7 Traps in GaAs and Backgating.....                   | 23 |

|   |    |
|---|----|
| 2.8 Backgating effect.....                        | 24 |
| 2.8.1 Backgating effects in GaAs FETs.....        | 26 |
| 2.8.2 Reduction of backgating.....                | 26 |
| 2.9 Life time and relaxation semiconductors.....  | 26 |
| 2.9.1 Characteristics of relaxation material..... | 29 |
| 2.9.2 Recombinative Pinning.....                  | 31 |

## **Chapter 3**

### **Modelling**

|  |    |
|--|----|
| 3.1 Introduction.....  | 33 |
| 3.2 The phenomenological Transport equation.....                 | 34 |
| 3.3 Discretization of the device .....                           | 36 |
| 3.4 Numerical method of resolution.....                          | 37 |
| 3.5 The channel conductance and substrate current modelling..... | 48 |

## **Chapter 4**

### **Results and Discussions**

|  |    |
|--|----|
| 4.1 Introduction .....   | 49 |
| 4.2 The conductance and substrate current in absence of traps.....                 | 50 |
| 4.3 The effect of deep acceptors.....  | 53 |
| 4.3.1 Temperature effect .....   | 56 |
| 4.4 The effect of deep donors.....   | 57 |
| 4.4.1 Temperature effect .....   | 59 |
| 4.5 The effect of donor traps in the presence of high density of acceptor traps... | 60 |
| 4.6 The effect of acceptors traps in the presence of high density of donor traps.. | 62 |
| 4.7 The effect of energy level position.....                                       | 64 |
| 4.7.1 Donor traps.....   | 64 |
| 4.7.2 Acceptor traps.....  | 65 |
| 4.8 Backgating with and without threshold.....                                     | 67 |
| 4.8.1.1 The donors effect.....   | 67 |
| 4.8.1.2 The effect of the energy level of the donor trap.....                      | 68 |
| 4.8.2.1 The acceptors effect.....  | 69 |
| 4.8.2.2 The effect of the energy level of the acceptor trap.....                   | 70 |

|   |    |
|---|----|
| 4.8.3 Temperature effect on the threshold voltage .....           | 71 |
| 4.8.4 Channel-Substrate spacing effect on threshold voltage ..... | 73 |
| 4.9 GaAs as relaxation material.....                              | 74 |
| 4.9.1 Introduction.....   | 74 |
| 4.9.2 Substrate current and the relaxation regime.....            | 74 |
| 4.10 The effect of substrate dopping.....                         | 76 |
| 4.10.1 The effect of acceptors.....                               | 76 |
| 4.10.2 The effect of donors.....                                  | 76 |
| 4.10.3 The effect of temperature .....                            | 77 |
| <b>Conclusion</b>   |    |
|   | 79 |
| Appendix A.....   | 81 |
| Appendix B.....   | 83 |
| References .....  | 84 |
